

eSight EyeWear

Glasses That Let The Visually Impaired See

eSight is a technological breakthrough that restores sight, and transforms lives.

Revolutionary technology that leaves you with zero words. And unlimited possibility.

We have created a seemingly impossible technology in order to help the visually impaired see the world, and change it too. eSight is a medical breakthrough that restores functional sight, and allows the visually impaired to see the faces of loved ones, read, work, study, and participate in virtually any Activity of Daily Living.

The doctor-recommended option, when you feel like you're out of options.

We know just how devastating vision loss is. It's why we've spent years working with with the world's leading eye-doctors to pioneer eSight's vision-restoring technology, and it's why we are now the largest lab in the world dedicated to resolving blindness through wearable technology.

An investment that returns your independence.

"Purchasing eSight is the best decision I have ever made. It saves me money, and it saved my life". Customers continue to share such inspiring feedback with us, and it's because eSight was designed to eliminate many costs associated with vision loss.

After getting eSight, our customers often:

- ° Use only eSight, instead of a combo of other expensive assistive devices
- ° Return to work and earn a living
- ° Commute independently
- ° Safely engage in virtually all daily activities

See for yourself. Whenever, wherever.

It's one thing for us to tell you how life-changing eSight is. But it's another for you or your loved one to put on eSight, and see, clearly. Our technology is available for you to try, in the comfort of your own home, workplace, or by appointment in my London consulting room.

TIME Magazine names "eSight 3" as One of the Best Inventions of 2017!

Contact Us

We would love to get in touch and discuss your options and give you a demo of our technology.

Please call in the first instance, or feel free to use the contact form, and someone will get back to you as soon as possible.
